Now, stand steady!—

All git ready
For the turnin' o' the leaf!

Till it just won't do!
Old things have left us,
An' the world's made new!

Vanity For Business Women.

Writing of "The Use of Vanity" to business women and others in the New Idea Woman's Magazine for January, Miss Harriet Martin says: "Women in business will eventually acquire that happy medium of self-confidence born out of a belief in their growing capability. Self-confidence is vanity regulated, controlled. It is better to think too well of oneself than too ill. And the sooner women look their estimate of themselves fairly in the face, the sooner they give themselves just cause for raising their estimate, the sooner they will possess the calmness and judgment necessary to business success. In short, belief in yourself, in your possibilities, in the worthiness of your plans, and your purposes, because they are yours, is the finest working basis under the sun. Since there is only one means of acquiring the right kind of vanity or of controlling the wrong kind—that is, listening to the dictates of your own mind and heart and acting accordingly, regardless of anything else—the sooner we all stop shamming and calmly accept ourselves for what we are worth, the sooner may we hope to accomplish something worth while. Are you a stenographer and do you wish to be a writer? Then write! Stuff and nonsense to the people who tell you to stick to the 'job' that brings you your bread and butter. There are more 'jobs' than one that bring bread and butter. If other people can write, why not you?"
